

# Data and information of Home Gardens in Ampara District

**Land Use Policy Planning Department  
Ministry of Lands and Land Development  
2020**

### **Definition for Home Garden<sup>1</sup>**

1. A piece of land which has a dwelling house and some form of cultivation can be considered as a home garden if the total area of the piece of land is **twenty or less than twenty** perches.
2. A piece of land which has a dwelling house and some form of cultivation, if total land areas is **more than twenty** perches can also be considered as a home garden if following two conditions are satisfied.
  - a. It is mainly meant for residential purposes.
  - b. A produce of cultivated land in the home garden is largely for home consumption.

### **Examples for Home Garden**

- a) A land of extent 20 perches or less has a dwelling house and a few bearing coconut trees.
- b) A land of 20 perches or less, has a dwelling house and having extensive cultivation mainly for commercial purposes

*By definition (1) this land can be considered as a home garden*

- c) A two acre land has dwelling house. Although the extent covered by a house is comparatively small and few crops are grown mainly for home consumption.

*According to definition (2) this land is also a home garden.*

- d) A small house in a two roods land. But the usable land has been intensively cultivated with vegetable crops which are mainly for sale.

*Although this land has a dwelling house and also extent is small, as the produce from the land is not mainly for home consumption, it will not be treated as a home garden.*

***However, in this survey cases like (d) have been treated as a home garden by excluding the area under commercial cultivation. For an example a one acre land with cinnamon cultivation (commercial purpose) also having a dwelling house, a small area around the house, may be 20 perches or less was separated out from the total land and considered as a home garden. Rest of the land was not counted to the home garden area and it was treated as land area under commercial cultivation.***

---

<sup>1</sup> Department of Census and Statistics, Sri Lanka.

### **Conversion Factors**

*All figures in the data tables are given in hectares. However, only total figures of all tables were converted into acres and given in a separate row at the end of each table. Due to inadequate space of the tables it is not possible to accommodate all figures in both units. The following conversion factors can be used to convert hectares into acres or perches.*

Unit	Metric	Conversion factor	Equivalent Imperial Unit
	Hectare	Multiply by 2.47	Acre
	Hectare	Multiply by 395	Perches

**Note:** *The home garden total extents given in the last two rows of the tables are presented as rounded figures without decimals. In some cases, when you are totaling the extent figures of the tables, total and grand total figures may slightly vary due to the adding of decimals.*

## **1. Distribution of home gardens in Ampara District**

Ampara District is located in the South East of Sri Lanka in the Eastern Province. This administrative district is divided into 20 Divisional Secretary Divisions (DSDs) and 507 Grama Niladhari Divisions. The topography of the district varies from flat to undulating. The elevation ranges from mean sea level to 500 m. This district receives a mean annual rainfall of 1,750 mm. Much of this rainfall is received between November and February during the period of the North-East Monsoon. The mean annual temperature varies from 25<sup>0</sup>C to 27<sup>0</sup>C . The maximum temperature is recorded in March/ April and the minimum temperature in November/ January.

Generally home gardens in the District show minimum composition diversity, compared to home gardens in the wet zone due to existing agro-ecological environment. The distribution pattern of the home gardens in the Ampara district is shown in Figure 1. The total number of home gardens in the district is about 205,860 and the total extent of all home gardens is about 32,732 ha. (80,847 acres). The total extents of home gardens in the District is less than the extent shown in the National Land Use Survey (NLUS) conducted in 2019. This is due to exclusion of some areas based on the home garden definition considered.

## **2. Present status of home gardens in Ampara District**

Among the total number of home gardens in the district, about 68% of home gardens are underutilized due to various reasons such as lack of water, lack of capital, wild animal threats, adverse physical conditions of the land, labour shortage, lack of know-how etc. (Fig. 2).

Home gardens are mainly having wells and pipe borne water as their water source. (Table 1 and Fig. 3).

### 3. Number of home gardens and their extents available in Ampara District

The total number of home gardens in the Ampara district is about 205,860. The size of the home gardens is varying and the majority are between 0.05-0.40 ha (21-160 perches). There are about 17,332 home gardens which are larger than 0.40ha. (160 perches or 1ac). There are about 56% of the home gardens (about 114,472 home gardens) in the district are having enough space for the cultivation of tree crops (Fig 4). Rest has no space may be due to either parcel is small in size or existing tree density.

Fig. 4. Comparison of space available home gardens with total number of home gardens in each Divisional Secretary Division.
