

Data and information of Home Gardens in Batticaloa District

Land Use Policy Planning Department
Ministry of Lands and Land Development
2020

Definition for Home Garden¹

1. A piece of land which has a dwelling house and some form of cultivation can be considered as a home garden if the total area of the piece of land is **twenty or less than twenty** perches.
2. A piece of land which has a dwelling house and some form of cultivation, if total land areas is **more than twenty** perches can also be considered as a home garden if following two conditions are satisfied.
 - a. It is mainly meant for residential purposes.
 - b. A produce of cultivated land in the home garden is largely for home consumption.

Examples for Home Garden

- a) A land of extent 20 perches or less has a dwelling house and a few bearing coconut trees.
- b) A land of 20 perches or less, has a dwelling house and having extensive cultivation mainly for commercial purposes

By definition (1) this land can be considered as a home garden

- c) A two acre land has dwelling house. Although the extent covered by a house is comparatively small and few crops are grown mainly for home consumption.

According to definition (2) this land is also a home garden.

- d) A small house in a two roods land. But the usable land has been intensively cultivated with vegetable crops which are mainly for sale.

Although this land has a dwelling house and also extent is small, as the produce from the land is not mainly for home consumption, it will not be treated as a home garden.

However, in this survey cases like (d) have been treated as a home garden by excluding the area under commercial cultivation. For an example a one acre land with cinnamon cultivation (commercial purpose) also having a dwelling house, a small area around the house, may be 20 perches or less was separated out from the total land and considered as a home garden. Rest of the land was not counted to the home garden area and it was treated as land area under commercial cultivation.

¹ Department of Census and Statistics, Sri Lanka.

Conversion Factors

All figures in the data tables are given in hectares. However, only total figures of all tables were converted into acres and given in a separate row at the end of each table. Due to inadequate space of the tables it is not possible to accommodate all figures in both units. The following conversion factors can be used to convert hectares into acres or perches.

| Unit | Metric | Conversion factor | Equivalent Imperial Unit |
|------|---------|-------------------|--------------------------|
| | Hectare | Multiply by 2.47 | Acre |
| | Hectare | Multiply by 395 | Perches |

Note: *The home garden total extents given in the last two rows of the tables are presented as rounded figures without decimals. In some cases, when you are totaling the extent figures of the tables, total and grand total figures may slightly vary due to the adding of decimals.*

1. Distribution of home gardens in Batticaloa District

Batticaloa District is located in the east of Sri Lanka in the Eastern Province. This administrative district is divided into 14 Divisional Secretary Divisions (DSDs) and 346 Grama Niladhari Divisions (GNDs). The topography of the district varies from flat to undulating. The elevation of the District is not exceeding 8 meters in height above mean sea level. Batticaloa district belongs to the Dry Zone. The rainfall is not equally distributed throughout the year and has a bimodal pattern having heavy intensity in the months of October to March with less shower in April to September. The annual average rainfall varies from 864 mm to 3,081mm. The mean annual temperature varies from 25^o C to 35^o C.

The general composition of the home gardens are not much diverse, compared to home gardens in the wet zone. The distribution pattern of the home gardens in the Batticaloa district is shown in Figure 1. The total number of home gardens in the district is about 145,911 and the total extent of all home gardens is about 13,925 ha. (34,395 acres). The total extents of home gardens in the DSDs are less than the extent shown in the National Land Use Survey (NLUS) conducted in 2019. This is due to exclusion of some areas based on the home garden definition considered.

2. Present status of home gardens in Batticaloa District

Among the total number of home gardens in the district, about 42% of home gardens are underutilized due to various reasons such as lack of water, lack of capital, wild animal threats, adverse physical conditions of the land, labour shortage, lack of know-how etc. (Fig. 2).

Home gardens are having different water sources while about 6% home gardens do not have any water source. Majority of the home gardens are wells as their water source. (Table 1 and Fig. 3).

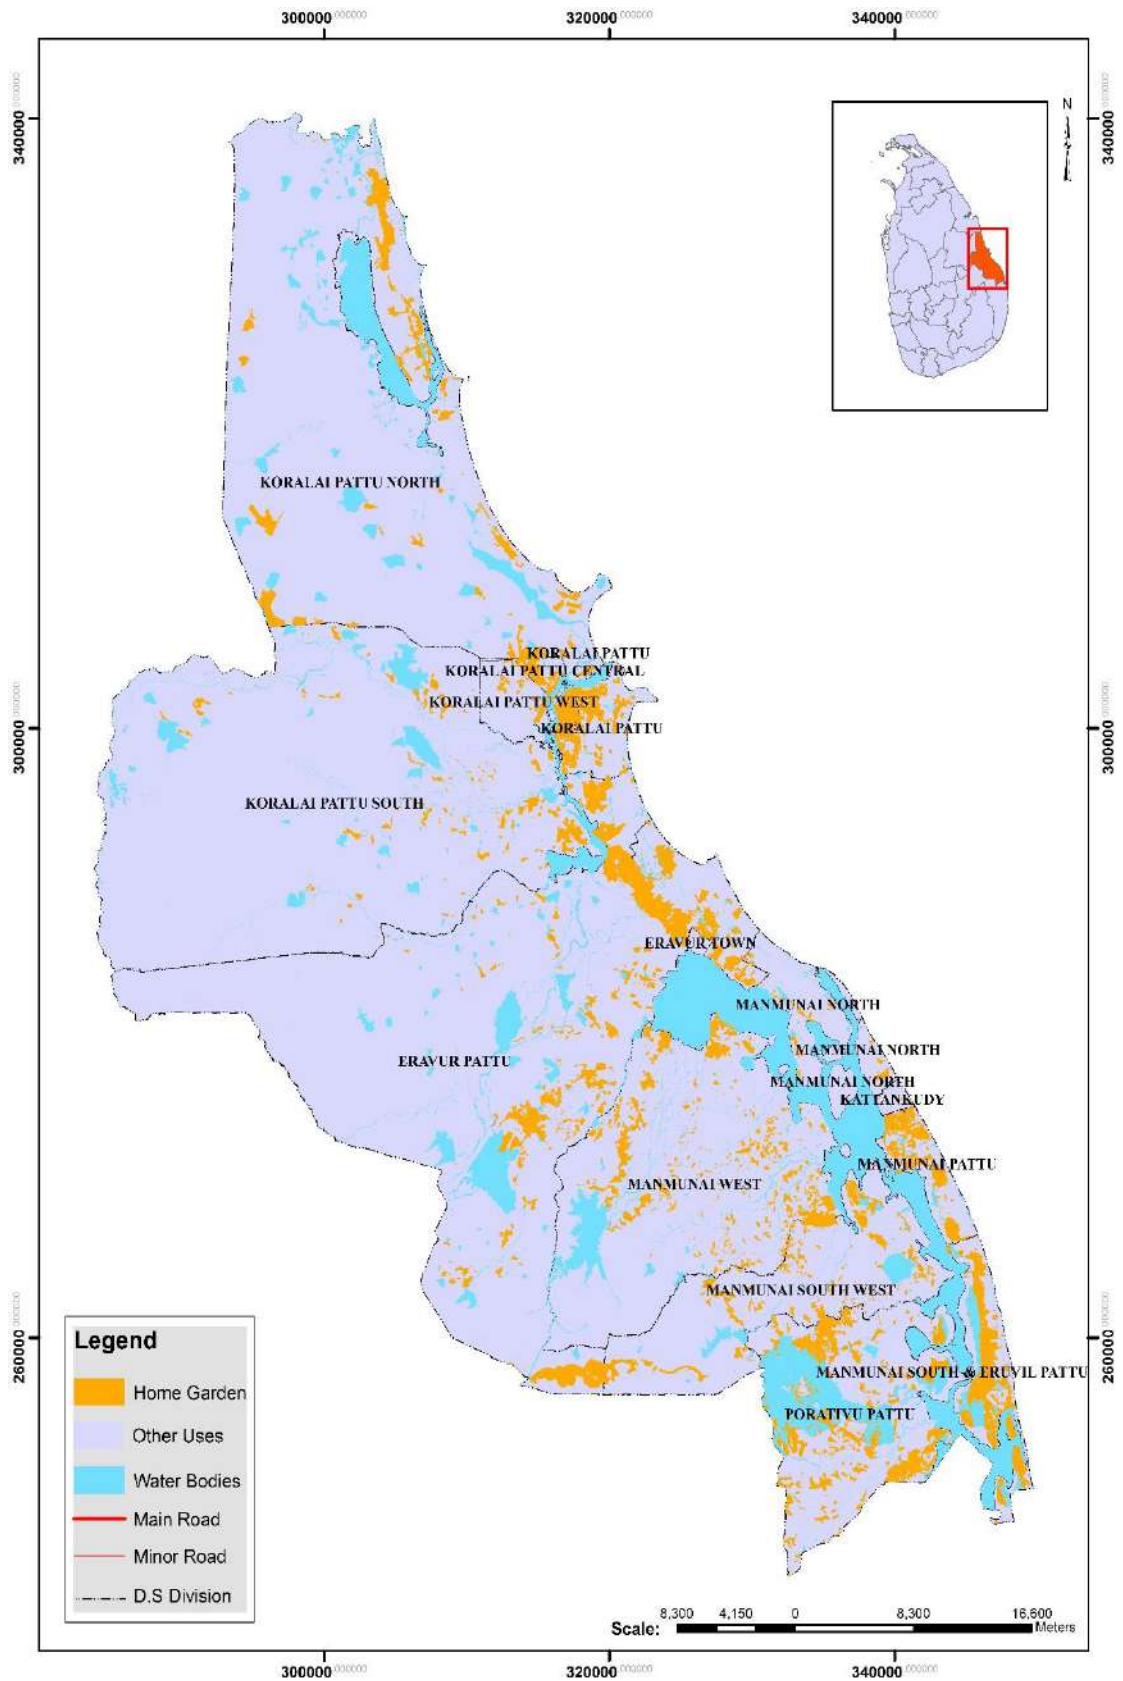

Fig. 1. Distribution of home gardens in Batticaloa District

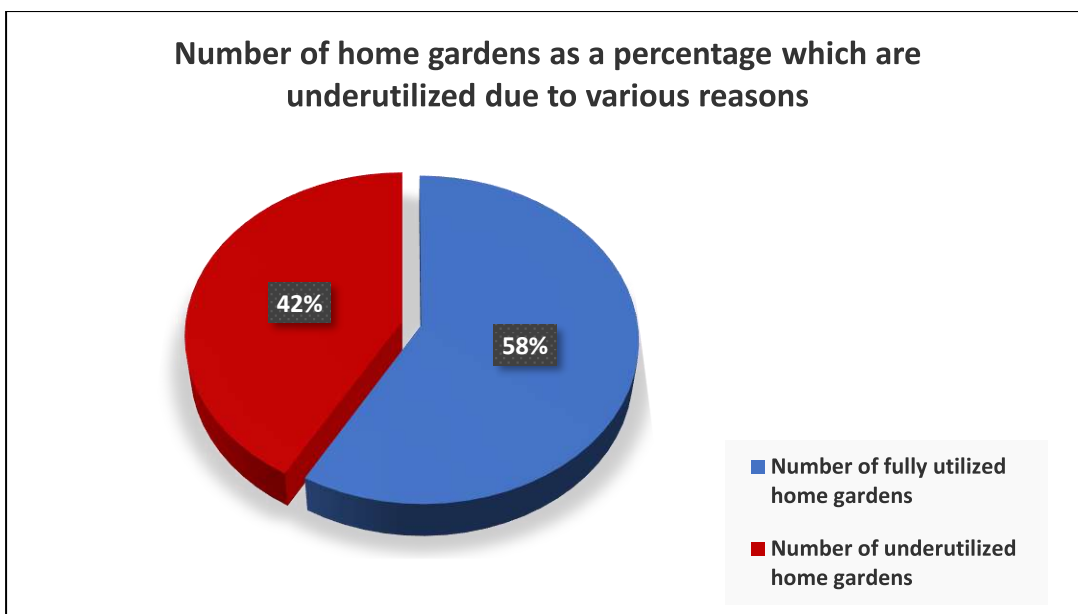

Fig. 2. Number of home gardens as a percentage of the total that are underutilized in Batticaloa District.

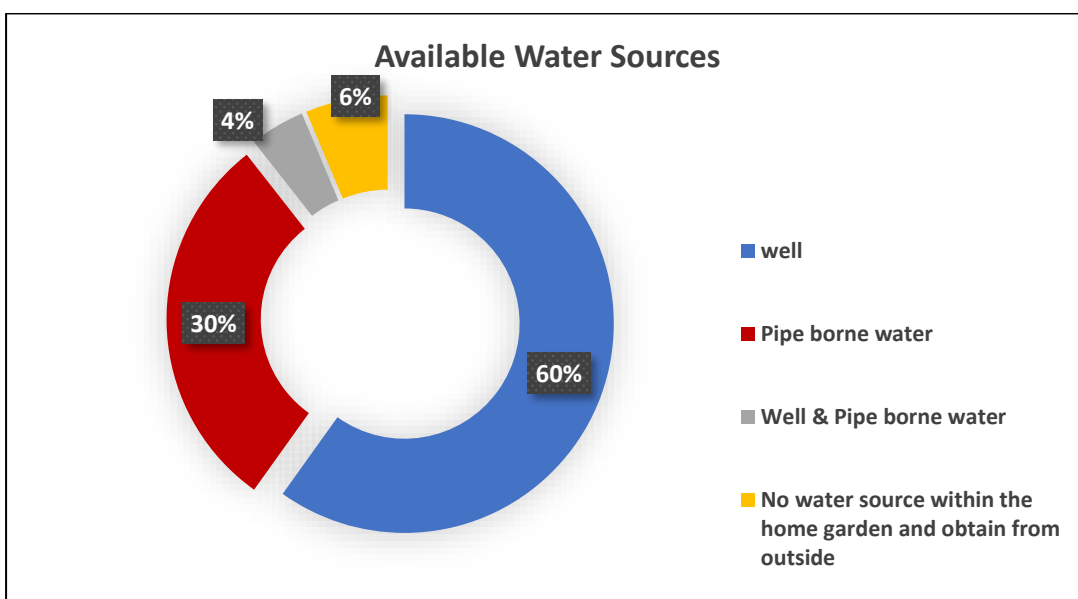

Fig.3 Number of home gardens and their percentages based on their water sources.

3. Number of home gardens and their extents available in Batticaloa District

The total number of home gardens in the Batticaloa district is about 145,911. The size of the home gardens is varying and the majority are less than 0.05ha (20 perches). There are about 3,657 home gardens which are larger than 0.40ha. (160 perches or

1ac). There are about 42 % of the home gardens (about 60,761 home gardens) in the district are having enough space for the cultivation of tree crops (Fig 4). Rest has no space may be due to either parcel is small in size or existing tree density.
