

Data and information of Home Gardens in Mullaitivu District

Land Use Policy Planning Department
Ministry of Lands and Land Development
2020

Definition for Home Garden¹

1. A piece of land which has a dwelling house and some form of cultivation can be considered as a home garden if the total area of the piece of land is **twenty or less than twenty** perches.
2. A piece of land which has a dwelling house and some form of cultivation, if total land areas is **more than twenty** perches can also be considered as a home garden if following two conditions are satisfied.
 - a. It is mainly meant for residential purposes.
 - b. A produce of cultivated land in the home garden is largely for home consumption.

Examples for Home Garden

- a) A land of extent 20 perches or less has a dwelling house and a few bearing coconut trees.
- b) A land of 20 perches or less, has a dwelling house and having extensive cultivation mainly for commercial purposes

By definition (1) this land can be considered as a home garden

- c) A two acre land has dwelling house. Although the extent covered by a house is comparatively small and few crops are grown mainly for home consumption.

According to definition (2) this land is also a home garden.

- d) A small house in a two roods land. But the usable land has been intensively cultivated with vegetable crops which are mainly for sale.

*Although this land has a dwelling house and also extent is small, as the produce from the land is not mainly for home consumption, it will not be treated as a home garden. **However, in this survey cases like (d) have been treated as a home garden by excluding the area under commercial cultivation. For an example a one acre land with cinnamon cultivation (commercial purpose) also having a dwelling house, a small area around the house, may be 20 perches or less was separated out from the total land and considered as a home garden. Rest of the land was not counted to the home garden area and it was treated as land area under commercial cultivation.***

¹ Department of Census and Statistics, Sri Lanka.

Conversion Factors

All figures in the data tables are given in hectares. However, only total figures of all tables were converted into acres and given in a separate row at the end of each table. Due to inadequate space of the tables it is not possible to accommodate all figures in both units. The following conversion factors can be used to convert hectares into acres or perches.

Unit	Metric	Conversion factor	Equivalent Imperial Unit
	Hectare	Multiply by 2.47	Acre
	Hectare	Multiply by 395	Perches

Note: *The home garden total extents given in the last two rows of the tables are presented as rounded figures without decimals. In some cases, when you are totaling the extent figures of the tables, total and grand total figures may slightly vary due to the adding of decimals.*

1. Distribution of home gardens in Mullaitivu District

Mullaitivu district located in the Eastern part of the Northern Province. The district has six Divisional Secretary Divisions (DSDs) and they consisted with 136 Grama Niladhari Divisions (GNDs). Generally, topography of the entire district is almost flat and elevation varies from sea level to 36 meters . District is in the dry zone where average annual rainfall varies from 1,200 mm to 1,900 mm and has a bimodal pattern with a dry spell. Average temperature of the district ranges from 23⁰C - 39⁰C. Higher rainfall receives during North East Monsoon period from early October to January. Major soil groups are Reddish-Brown Earth associated with Low Humic gley soils and red yellow latosol soils which are suitable for cultivation.

Generally, composition of the home gardens in the district rather uniform compared to the home gardens in the wet zone. The distribution pattern of the home gardens in the Mullaitivu district is shown in Figure 1. The total number of home gardens in the district is about 39,480 and the total extent of all home gardens is about 20,904 ha. (51,632 acres).

2. Present status of home gardens in Mullaitivu District

Among the total number of home gardens in the district, about 68% of home gardens are underutilized due to various reasons such as lack of water, lack of capital, wild animal threats, adverse physical conditions of the land, malfunctioning lift irrigation structures, labour shortage, absentee landlord etc. (Fig. 2).

Most of the home gardens are having wells as their water source, however, some of the wells are drying during the prolonged dry period. Pipe borne water is available Manthai East and Thunukkai D.S. Divisions.

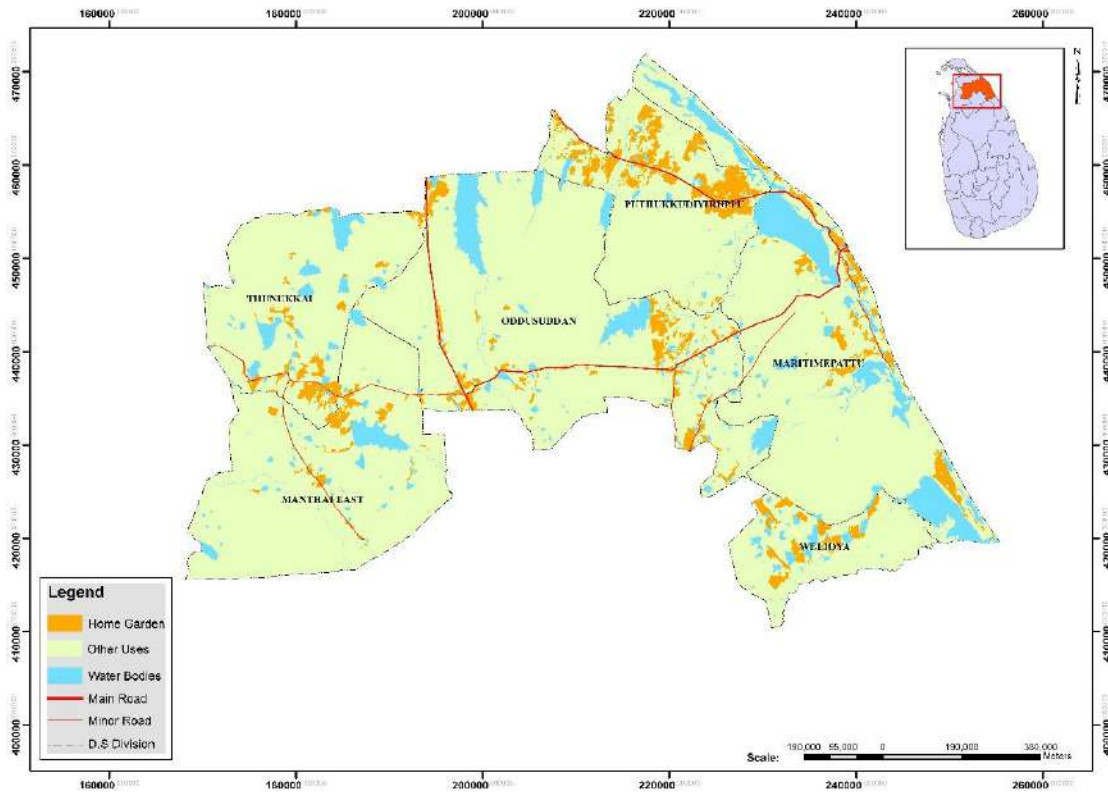

Fig 1. Distribution of home gardens in Mullaitivu District

Fig. 2. Number of home gardens as a percentage of the total that are underutilized in Mullaitivu District.

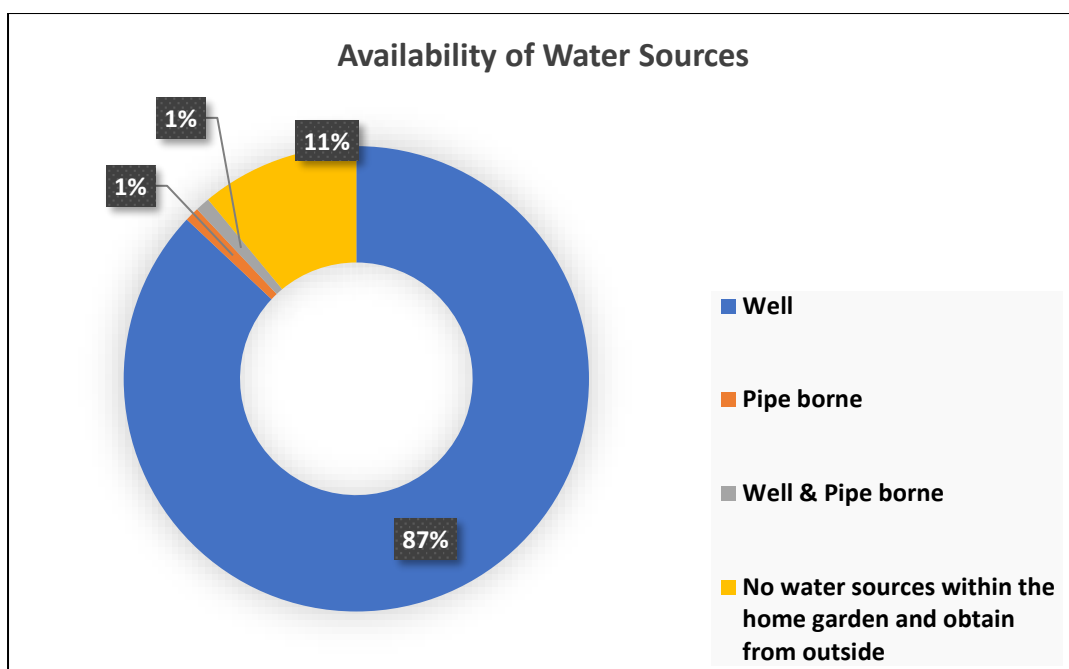

Fig.3 Number of home gardens and their percentages based on their water sources.

Table 1. Availability of water sources in the home gardens in Mullaitivu District

No.	DSD Name	Total no of home gardens	Water Source				
			well	Pipe borne water	Well & Pipe borne water	Other sources like water sprout in the land	No water source within the home garden and obtain from outside

6	Welioya	4,911	4,911	-	-	-	-
Total		39,480	34,660	268	339	-	4,213

3. Number of home gardens and their extents available in Mullaitivu District

The total number of home gardens in the Mullaitivu district is about 39,480. The size of the home gardens is varying and the majority are between 0.05-0.40 ha (21-160 perches). There are about 16,022 home gardens which are larger than 0.40ha. (160 perches or 1ac). More number of home gardens are available in Puthukkudiyiruppu D.S. Division, but home gardens in the Oddusuddan D.S. Division are large in size.
